**A PASSOVER GUIDE
TO COSMETICS
AND MEDICATIONS**

Office:

223 South Formosa Ave
(323) 933 - 7193

Bais Medrash:

7216 Beverly Blvd.
Los Angeles, California 90036

Prepared by Rabbi Gershon Bess

Copyright 2020 Kollel-Los Angeles
All Rights Reserved

Chasdei Hashem, the Kollel has been *zoche* to provide the *tzibbur* with the Pesach Guide to Cosmetics and Medications some 29 years. We *daven* to Hashem to be able to continue this practice for many years to come. This is done with the hope of increasing your Pesach convenience and limiting its cost. The Guide is the original research of Rabbi Gershon Bess שליט"א, Rav of the Congregation Kehilas Yaakov, and an alumnus of Kollel Los Angeles. While several prominent Rabbonim have questioned the need for this list, Rav Yosef Shalom Eliyashiv זצוק"ל, Rav Shmuel Vosner זצוק"ל, and other *gedolei yisroel* have urged, both for reasons in הלכה and מנהג, that the established practice be continued. (See further Understanding the Halochos and List).

For any further questions, you may email Rabbi Bess at rgbess@hotmail.com. To put yourself on future mailing lists, please fax at (323) 933-7493 or email at office@kollella.com.

As a community kollel, our Kollel Shiurim Program continues to respond to a generation that "seeks to know". Hundreds of adults presently participate in twenty-five different *shiurim* and Torah study groups.

This year the Kollel maintains an all learning component of eleven *avreichim* who are totally and diligently immersed in the depths of Torah study. Forty-four years ago this summer, this unique entity was established as an exemplary expression of Community Kollel, first and foremost - a Kollel. While *shiurim* and קריירה are important aspects of the institution, they are peripheral. The overriding focus is upon *shteigen in learnen* (growth in learning) on the part of the *avreichim* themselves. This is the קרן. All other activities are פירות. This Kollel is first and foremost - a Kollel. It has stood, and continues to stand ב"ד, as a magnificent example for other American cities and neighborhoods, which are increasingly establishing and seeking to establish kollelim.

As a dynamic institution, there is rarely a year, ב"ד, that we are not privileged to a significant new development. Kollel Los Angeles does not insist that its *avreichim* enter עבודת הקודש. However, of some eighty five alumni, all, but five or six are fully installed in positions of community leadership, ראשי כולל, ראשי ישיבה, מחנכים, רבנים, and מנהלים.

Today's competitive world causes us to be ever more grateful to the *yungerman* who is privileged to find a position suitable to his particular talents. We thank *Hashem Yisborach*, מעומק הלב, that Rabbi Chaim Minder has been selected to teach the seventh grade class of Yeshiva Ketana of Los Angeles in Valley Village this past year. His tremendous dedication and creativity is a true inspiration to his תלמידים, and is something greatly appreciated and respected by both the parents and staff of Yeshiva Ketana. May Rabbi Minder be *gebenched* with tremendous *hatzlacha* in his הרבצת התורה.

יהי ד' בעזרנו להגדיל תורה ולהאדירה, ולהוליך אותנו בדרך ישרה תמיד!

ואנו תודה ותפילה למקום, שכשם שזכינו כן נזכה!

We extend to each and every one our best wishes for a Chag Kosher V'Sameach.

Kollel Los Angeles

Important: No one should refrain from taking any required medication, even if it contains *chometz*, without first consulting his/her physician and Rav.

Note: All medications for a heart condition, diabetes, abnormal blood pressure, stroke, kidney disease, lung disease, depression, epilepsy, the immune system (transplant anti-rejection), and cancer treatment (including precautionary) may be taken on Pesach.

Furthermore, all prescription medication taken on a regular basis for chronic conditions should only be changed with the consultation of your physician (if you can not reach your physician you should continue to take your regular prescription and not change). Some examples of such chronic conditions include the following: Any psychiatric condition, prostate condition, crohn's disease, colitis, high cholesterol, Parkinson's disease, anemia, multiple sclerosis, thyroid condition and asthma.

UNDERSTANDING THE HALACHOS AND LIST

I. UTILIZING THE LIST

Choleh Sh'yesh Bo Sakana – L'halacha such a *choleh* may take anything if a substitute is not available. Unfortunately, there are individuals who incorrectly decide without consulting a physician to discontinue taking medication for life threatening conditions on *Pesach*, unless the medicine appears on an approved list. The list provides necessary information for consumers, insuring that such mistakes are not made.

Furthermore, as indicated, even one who is in *sakana* should l'*chatchila* use a medication that is *chometz* free, if possible. This list provides this information.

Choleh Sh'ein Bo Sakana – Such an individual may not consume *chometz* in a normal manner, but may eat *kitniyos*. Medicine taken by such individuals often lists ingredients that may be derived from *chometz*. For example, sorbitol, a sweet calorie-free sugar alcohol derived from glucose and found in medication, mouthwash, and toothpaste, is often derived from corn, but could also come from wheat. There is no way to know its source from the label. The research confirms which products are *chometz* free.

Mechush or Boh'ree – Such a person may only take *chometz*-free and, preferably, *kitniyos* free products. This list provides *chometz*-free information (e.g. which aspirin or ibuprofen may be taken) and often indicates when there is no *kitniyos*, as well.

Note: Except where indicated, the list does not address the kosher status of the product, only the *chometz* free status. This means that if a product appears on the list it does not necessarily mean that the product is kosher. It may be non-kosher and

chometz free. For a full discussion regarding the laws of taking non-kosher medication during the year see Kashrus Kurrents article – ‘A Kashrus Guide to Medications, Vitamins, and Nutritional Supplements’ at www.star-k.org.

II. COSMETICS

L'halacha, any *Chometz* that has decayed or deteriorated and no longer fit for canine consumption (*nifsal mayachilas kelev*) may be used on *Pesach*. Nonetheless, people have acted stringently with regard to these items for several reasons.

1. Many products, including shaving lotion and perfume, contain denatured alcohol which can be restored into regular alcohol. According to most opinions, one should not use such products on *Pesach*. The list states products which do not use *chometz* based alcohols.

2. The Biur Halacha (326:10 *B'shaar*) writes in the name of the *Gra* that one should be strict and not use non-kosher soap all year (*sicha kishtiya*). Although we are not accustomed to this stringency, on *Pesach* many individuals have adapted this *chumrah* and do not allow use of *chometz* items even if they are used externally.

3. There is an opinion that the leniency of “*nifsal*” only applies to *chometz* that has decayed, not to an item that is initially produced as a non-food item. This was the generally accepted custom on *Pesach*.

4. Lipstick is often inadvertently ingested when eating food. If lipstick contains *chometz*, it is *halachically* permissible to apply it since the lipstick is unfit for canine consumption. Nevertheless, most women prefer not to consume even a trace of anything prohibited. The list provides *chometz*-free lipsticks.

5. Mouthwash and Toothpaste contain Alcohol, sorbitol and other ingredients which may be derived from *chometz*. Although *l'halacha* these items may be permissible to use if they are *nifsal mayachilas kelev*, many prefer not to use them as they are taken orally. The list provides information regarding such products.

6. Historically, it has been the custom to follow stringent opinions regarding *Hilchos Pesach*. In addition, it has been a prevalent custom to restrict the use of items which may contain *chometz*, even when they are clearly *nifsal mayachilas kelev*. The list provides accurate information for those who wish to continue to follow the stricter opinion and prevailing custom when using such products. שו"ת דברי מלכאל ח"ד כ"ב:ו ושו"ת חסדון נחום סי' מ"ו

HOW TO USE THE GUIDE

Each product is preceded with a code to identify the manufacturer. Some products are preceded by an asterisk [*]. This signifies that the product **may or does** contain a *Chometz* ingredient. *We have indicated "no animal" or "contains animal" when that information has been provided to us. When no mention of animal is made next to a product, the product still may be non-kosher. We have indicated "kitniyos" or "no kitniyos" when the information has been provided to us and it is relevant. When no statement regarding kitniyos has been made, the product may or may not contain kitniyos. The latest updates can be found at the following website: www.kehilasyaakov.org*

The *first section* contains a list of products, such as: **Blush, Creams, Deodorant, Toothpaste, etc**, followed by miscellaneous items. They are each listed in product alphabetical order. The *second section* lists **Medications, Vitamins and Dietary Supplements**, alphabetically. Manufacturer names are important, since many medications have similar names, but are not manufactured from the same source material. A cough elixir made by one company may be permitted since the company may use a **chometz based** grain alcohol. We have contacted many

companies including generic manufacturers and have included medications from the companies who responded. The list applies to medications distributed by the indicated US company. Products with identical names from generic companies or foreign countries may have different formulations thus compromising their Passover status.

Note: Adwe has a full line of Kosher l'Pesach medications and toiletries available online at Koshervitamins.com.

Most cosmetics, creams, ointments, lotions, etc. may not be applied on Shabbos & Yom Tov. Consult your Rov for specific details.

The following are common ingredients that are derived from chometz

- | | |
|--|---|
| * Amino Peptide Complex | * Oat Flour |
| * Amp-Isostearoyl Hydrolyzed Wheat Protein | * Phytosphingosine Extract |
| * Avena Sativa (Oat) Kernel Flour | * Prolamine |
| * Avena Sativa Flour | * Secale Cereal (Rye) Seed Flour |
| * Avena Sativa Kernel Protein | * Sodium C8-16 Isoalkyl Wheat Protein Sulfonate |
| * Barley Extract | * Sodium Lauroyl Oat Amino Acids |
| * Beta Glucan | * Stearyltrimoniumhy.opyl Hydro Wheat Protein |
| * Cyclodextrin | * Triticum Vulgare (Wheat) Flour Lipids |
| * Dextrin | * Triticum Vulgare (Wheat) Germ Extract |
| * Dextrin Palmitate | * Triticum Vulgare (Wheat) Germ Oil |
| * Disodium Wheatgermido Peg-2 Sulfo | * Triticum Vulgare (Wheat) Gluten |
| * Hordeum Vulgare Extract | * Triticum Vulgare (Wheat) Starch |
| * Hydrolyzed Malt Extract | * Wheat Amino Acids |
| * Hydrolyzed Oat Flour | * Wheat Bran Extract |
| * Hydrolyzed Vegetable Protein | * Wheat Germ Extract |
| * Hydrolyzed Wheat Flour | * Wheat Germ Glycerides |
| * Hydrolyzed Wheat Gluten | * Wheat Germ Oil |
| * Hydrolyzed Wheat Protein | * Wheat Germamidopropyl EthyldimEthosulfate |
| * Hydrolyzed Wheat Protein Pg-Propyl Silanriol | * Wheat Germamidopropalkonium Chloride |
| * Hydrolyzed Wheat Protein/ PVP Crosspolymer | * Wheat Germamidopropyltrimonium Hydroxypropyl Hydrolyzed Wheat Protein |
| * Hydrolyzed Wheat Starch | |
| * Hydroxypropyltrimonium Hydro Wheat Protein | |
| * Malt Extract | |
| * Maltodextrin | * Wheat Protein |
| * Oat Beta Glucan | * Wheat Sphingolipids |
| * Oat Extract | * Yeast Extract |
